

Please reject NAB's petition 04-160I am a new satellite radio customer due to an upcoming move to an area that has very few local stations.

The right to purchase and enjoy satellite radio is one of the odes to technology meets people on an attainable level.

Without the satellite radio, the weather and traffic, etc, our new environment would definately be missing something.

Besides, we paid for 2 years subscription in advance for access to all the present satellite radio stations.

Respectfully,  
T. D. Pitre
